PREFACE.

THIS little Manual was originally prepared for the NORMAL CLASS, at the request of the editor of that Journal, and was at the same time expected to form an instruction book at the Sunday-School Assembly annually held at Chautauqua. This accounts for its form in twelve series of two pages each. The reading lessons, however, have been made sufficiently full for subsequent study. Of course the simplest elements only of the Greek language can be comprised in such narrow limits; nor can a full vocabulary or ready facility be acquired in so short a course. Nevertheless, a *good beginning* may be made, and that is "half the battle" in any enterprise. It is believed that a thorough mastery of this small volume will prove a conquest over all the real difficulties of the original tongue of the New Testament.

GREEK IN A NUTSHELL.

LESSON I.—READING.

§ I. THE ALPHABET.

Form.	Name.	Sound.
A a	Al'pha	a in <i>man</i> , [arm. ¹]
B β	Be'ta	b
Γ γ	Gam'ma	g in <i>go</i> , [king. ²]
Δ δ	Del'ta	d
E ε	Ep'silon	e in <i>met</i> .
Z ζ	Ze'ta	dz in <i>adze</i> .
H η	E'ta	e in <i>they</i> .
Θ θ or θ	The'ta	th in <i>thin</i> .
I ι	Io'ta	i in <i>tin</i> , [machine. ³]
K κ or x	Kap'pa	k
Λ λ	Lamb'da	l
M μ	Mu	m
N ν	Nu	n
Ξ ξ	Xi	x
O ο	Om'icron	o in <i>not</i> .
Π π	Pi	p
Ρ ρ	Rho	r
Σ σ, final c	Sig'ma	s in <i>this</i> .
Τ τ	Tau	t in <i>it</i> .
Υ υ	U'psilon	u in <i>full</i> .
Φ φ	Phi	f
Χ χ	Khi	kh (German <i>ch</i> .)
Ψ ψ	Psi	ps
Ω ω	O'mega	o in <i>no</i> .

§ 2. Notes on the Alphabet.

1. a sounds broad, like a in *arm*, at the end of a word, and before ρ final or ρ followed by a different consonant.

2. γ has the nasal sound, like *ng* in *king*, before γ, κ, χ, or ξ.

3. ι has its long sound, like *i* in *machine*, at the end of a syllable.

Every letter is sounded, and, with the above exceptions, invariably the same.

2. ACCENT.

§ 3. Each word, except a very few monosyllables, has one of the following accents written over a vowel in it, which marks the place of the spoken tone. A few small words, called *enclitics*, generally throw their accent, as an acute, on the last syllable of the preceding word.

§ 4. The *acute* (´), which is the foundation of all the accents, stands on one of the last three syllables. In verbs, with the exception of certain forms, it stands as far toward the beginning of the word as the rules below allow. In other parts of speech it stands on the same syllable as in the ground-form, (that given in the lexicon,) except as required by these rules. When the last syllable has a long vowel or diphthong it stands on the syllable before the last.

§ 5. The *grave* accent (`) is only written in place of the acute on the last syllable when *not* before a pause, or when unemphatic. It is understood to belong to all other syllables.

§ 6. The *circumflex* (˘) is placed on a syllable formed by the combination of two, the first of which had an acute and the second a grave; hence only on the last, or next to the last syllable, and only on a long vowel or a diphthong. When the last syllable has a short vowel, such a penult, if accented, takes the circumflex.

3. BREATHINGS, VOWELS, DIPHTHONGS, ETC.

§ 7. A vowel beginning a word takes either the *rough breathing*, (´), which is pronounced like *h*, or else, to show the absence of that, the *smooth breathing*, (˘), which has no appreciable sound. Initial ρ and υ always take the rough breathing; and double ρ in the middle of a word takes the smooth breathing on the first, and the rough on the second.

§ 8. The vowels are short, (e and o,) long, (η and ω,) or doubtful, (a, ι, and υ,) which last, although naturally short, are sometimes lengthened by derivation.

§ 9. The diphthongs are as follows:—

Proper.		With Iota Subscript.			Improper.		
αι	sounds	ay	α	=	α	ηυ	= η and υ
ει	"	i	η	=	η	ωυ	= ω and υ
οι	"	oy	ω	=	ω		
υι	"	we					
αυ	"	ow					
ευ	"	yw					
ου	"	oo					

§ 10. In diphthongs the breathing and accent are written over the *second* vowel. A capital (initial) letter in other cases takes them *before* it.

§ 11. The punctuation marks are the comma, (,) the semicolon, (;), the period, (.), and the interrogation point, (:).

LESSON II.

EUPHONIC CHANGES.

§ 12. When two *consonants* come together the first is made **homogeneous** with the second, as follows:—

§ 13. Mutes of a different class must have the same degree of hardness according to the following classification:—

	Smooth.	Middle.	Rough.	Sibilant (with <i>s</i> .)
Kappa-mutes	κ	γ	χ	ξ
Pi-mutes	π	β	φ	ψ
Tau-mutes	τ	δ	θ	ζ

§ 14. A *smooth* final mute is roughened before a vowel with the rough breathing. A rough mute is not doubled, nor can successive syllables begin with an aspirate. A tau-mute is sometimes dropped before *σ*, and always before *κ*; before a different tau-mute it is changed into *σ*.

§ 15. Before *μ* a kappa-mute is changed into *γ*, a pi-mute into *μ*, and a tau-mute into *σ*.

§ 16. *ν* before a kappa-mute becomes *γ*, before a pi-mute *μ*, before a liquid (*λ*, *μ*, *ν*, or *ρ*) it is changed into the same liquid, before *σ* or *ζ* it is dropped.

§ 17. *ν* is appended to certain endings in *σ* or *ε* before a pause or a vowel.

§ 18. There are several other less important rules, and some exceptions to most of the above.

§ 19. A *long vowel* or *diphthong* is used as an equivalent for two (usually short) vowels in immediate succession, or as a compensation for the omission of a consonant, sometimes for both.

§ 20. The changes in the union of two vowels are various, depending upon their comparative strength, position, and relation to the long vowels, or diphthongs respectively. They are readily learned by practice.

§ 21. Compensation is not always thus made for the omission of a consonant. Sometimes the omission occurs too far back in the derivation to be easily traced.

§ 22. A final vowel is sometimes elided before another vowel, and its place indicated by the apostrophe, (').

§ 23. There are several *dialects*, which chiefly affect the vowels, (like provincial pronunciation;) but in later Greek (to which the New Testament belongs) they were merged in "the common dialect," the Attic predominating.

NOUNS.

Nouns are of three declensions, three genders, three numbers, and five cases, all indicated by changes of termination.

§ 24. The declensions (numbered 1, 2, and 3) are only different modes of inflection.

§ 25. Names and designations of males, nations, the months, rivers, and winds, are almost invariably *masculine*; those of females, countries, islands, cities, trees, and plants, are usually *feminine*; of the *neuter* gender are most names of fruits and diminutives, and always the names of the letters, infinitives, clauses, indeclinable words, and words used as the symbol of a sound. In the third declension especially the (grammatical) gender in many instances is arbitrary.

§ 26. The *singular* and *plural* are used as in English. The *dual* denotes two or a pair; it is comparatively rare, and never occurs in the New Testament.

§ 27. The *cases* express the relations of words to each other in a sentence, as follows:—

Name.	Use.	Equivalent.
Nominative.	Subject of a finite verb.	(Simple form.)
Genitive.	Origin or ownership.	From, of, etc.
Dative.	Position or manner.	In, by, for, to, etc.
Accusative.	Direction or object.	Toward, into, etc.
Vocative.	Address.	O!

§ 28. The following are the terminations of the *First Declension*:—

Singular.		Cases.	Plural. Masc. and Fem.
Masc.	Fem.		
ας or ης	α or η	Nominative.	αι
ου	ας or ης	Genitive.	ων
α or η		Dative.	αις
αν or ην		Accusative.	ας
α or η		Vocative.	αι

Dual. Nom., Acc., Voc., *α*; Gen., Dat., *ων*.

§ 29. The *α* in the terminations of the singular is mostly used when *ρ*, *ε*, or *ι* precedes it; and in the Nom., Acc., and Voc. when *λ* or *σ*, and frequently when *ν*, precedes it. A few nouns have *α* in the Gen. sing.

LESSON III.

NOUNS—Continued.

§ 30 The following are the terminations of the *Second Declension* :—

Singular.		Cases.	Plural.	
Masc.	Neut.		Masc.	Neut.
ος	ον	Nominative.	οι	α
	ου	Genitive.		ων
	ω	Dative.		οις
	ον	Accusative.	ους	α
ε	ον	Vocative.	οι	α

Dual. Nom., Acc., Voc., ω ; Gen., Dat., ον.

§ 31. The few fem. nouns of this declension take the masc. terminations. The Voc. masc. sing. is occasionally ος.

§ 32. The following are the terminations of the *Third Declension* :—

Singular.		Cases.	Plural.	
Masc. and Fem.	Neut.		Masc. and Fem.	Neut.
ς (or long vowel before final letter.)	(naked stem.)	Nominative.	ες	α
	ος	Genitive.		ων
	ι	Dative.		οι(ν)
ν or α	(naked stem.)	Accusative.	ας	α
(like Nom. or Neut.)	(naked stem.)	Vocative.	ες	α

Dual. Nom., Acc., Voc., ε ; Gen., Dat., ον.

§ 33. The Nom. sing. is so often changed by the euphonic rules that the stem of the noun is best seen in the Gen. Nouns in ις, υς, and ενς take the (Attic) Gen. εως, (ω regarded as short.) The α of the Acc. sing. is usually after a consonant. Many irregularities and some anomalies occur, which may generally be learned from the lexicon.

ADJECTIVES.

§ 34. These are declined like nouns, having sometimes three sets of terminations for the respective genders, sometimes two, (masc. and fem. alike,) rarely but one, (all genders alike.) The masc. and neut. are always of the same declension, (second or third,) and the fem., when different, always of the first. *Participles* are declined like adjectives.

§ 35. Adjectives are compared either by using an adverb expressive of degree, or, more regularly, by adding to the stem of the positive the syllables *δρεπος* or *λων* for the comparative, and *δρατος* or *ιστος* for the superlative. Some euphonic changes occur in making these additions, which then take the regular declensional endings.

NUMERALS.

§ 36. The cardinal numbers are either simple, (the units, tens, and a few others,) or compound, (intermediate numbers.) Those from one to four inclusive, and the hundreds and thousands, are declined like adjectives. They may all be learned from the lexicon.

§ 37. The ordinals are mostly formed from the cardinals by adjective endings.

PRONOUNS.

§ 38. Of the personal pronouns, those of the 1st and 2d persons only are specially noteworthy, being declined as nouns irregularly :—

	I or Me.	We or Us.	Thou or Thee.	Ye or You
Nominative.	ἐγώ	ἡμεῖς	σύ	ὑμεῖς
Genitive.	(ἐ)μοῦ	ἡμῶν	σοῦ	ὑμῶν
Dative.	(ἐ)μοί	ἡμῖν	σοί	ὑμῖν
Accusative.	(ἐ)μέ	ἡμᾶς	σέ	ὑμᾶς

§ 39. The rest are declined as adjectives—masc. ος, fem. η, neut. ο ; often compounded, one or both parts being declined ; but, with the exception of τις, (interrogative τις, indefinite τις,) neut. τι, Gen. τινος, of the third declension, the article (definite only) and the demonstrative alone are very peculiar in declension, as follows :—

Singular.			The.	Plural.		
Masc.	Neut.	Fem.		Masc.	Neut.	Fem.
ὁ	τό	ἡ	Nominative.	οἱ	τά	αἱ
τοῦ	τῆς		Genitive.	τῶν	τῶν	
τῷ	τῇ		Dative.	τοῖς	ταῖς	
τόν	τό	τήν	Accusative.	τούς	τά	τάς

Dual. Nom., Acc., Voc., τό, τά ; Gen., Dat., τοῖν, ταῖν.

Singular.			This, These.	Plural.		
Masc.	Neut.	Fem.		Masc.	Neut.	Fem.
αὐτός	τοῦτο	αὐτή	Nominative.	οὗτοι	ταῦτα	αὐταί
τούτου	ταύτης		Genitive.	τούτων	τούτων	
τούτῳ	ταύτῃ		Dative.	τούτοις	ταύταις	
τούτον	τοῦτο	ταυτήν	Accusative.	τούτους	ταῦτα	ταύτας

Dual Nom., Acc., Voc., τούτω, ταῦτα ; Gen., Dat., τούτοιν, ταύταιν

LESSON IV.

VERBS.

§ 40. There are three VOICES, *Active, Middle, and Passive*, generally distinguished by the *termination*.

The Middle is properly *reflexive*. Some of its tenses have an *active* meaning. A few verbs, called *deponent*, are throughout pass. in form, but act. or mid. in meaning.

§ 41. There are five MOODS in each voice, the *Indicative, Imperative, Subjunctive, Optative, and Infinitive*, to which may be added the *Participles*; they are mostly known by means of the *union-vowel*—that which immediately precedes the termination.

§ 42. The Indic., Imper., Infin., and Participles correspond to the English, and have a *short* union-vowel, (*e, o, or a,*) except the Perf. and Pluperf. pass., which have no union-vowel; the Pluperf. act. and mid., which have *ei*; and the Aorists pass., which have *η* or its equivalent.

§ 43. The Imper. has but two persons, 2d and 3d. The Infin. has but one termination for all numbers and persons, and is very often used as a neut noun, with the article, etc., yet retaining its construction as a verb.

§ 44. The Subj. and Opt. are used in certain *dependent* relations, like the English subjunctive and potential; the former has a *long* union-vowel, (*η* or *ω,*) and the latter a diphthong, (*οι, αι, or ει.*) The former generally represents an act as contingent upon *outward* circumstances, and the latter upon a *will*.

§ 45. The TENSES are nine, the *Present, Imperfect, Perfect, Pluperfect, two Aorists,* (1st and 2d, equivalent in sense,) and three *Futures,* (1st and 2d, equivalent to each other, and 3d, very rarely used;) they are distinguished by certain letters prefixed, inserted, or added to the stem or root of the verb. They represent time as compared with the *present*, and never date from that of a preceding verb.

§ 46. The Pres., Perf., Pluperf., and Fut. answer very nearly to the same tenses in English.

§ 47. The Imperf. denotes an act as going on, but incomplete or habitual at some time past: “*was doing,*” etc.

§ 48. The Aorists indicate a single act at a definite time, (past in the Indic., but undetermined in the others moods.)

§ 49. All the tenses with respect to *form* may be classed thus:—

I. <i>Primary, or Absolute.</i>	Present.	Perfect.	Futures
II. <i>Secondary, or Historical.</i>	Imperfect.	Pluperfect.	Aorists.

These classes usually have the following endings respectively:—

Active Form.				Persons.	Middle and Passive.	
I.	II.	III.	I.		II.	
Pres. and Fut.	Perf.	Opt.		Sing.		
ο	—	ν	μ	1st	μαι	μην
ις	ς			2d	σαι	(σ)ο
ι	—			3d	ται	το
		μεν		Plur.		
		τε		1st	μεθα	
				2d	σθε	
		(ντ) οι (ν)	(σα)ν	3d	νται	ντο
				Dual.	1st, μεθον,	2d, σθον,
					3d, σθην.	

Notes on the Table of Verb Endings.

§ 50. In the Pres. and Fut. the *ο* of the 1st sing. act. is contracted (with the union-vowel) into *ω*, and the *σαι* of the 2d sing. pass. into *η* or *ει*.

§ 51. Signification limits the primary terminations to the Indic. and Subj., and the secondary to the Indic. and Opt.; likewise the Imperf. and Pluperf. to the Indic., and the Imper. to the Pres., the Aorists and (rarely) the Perf.

§ 52. The *active* terminations are assumed throughout by the Perf. and Pluperf. mid., and the Aorists pass.

§ 53. The terminations of the Imper. are analogous to the secondary in the act., and in the mid. and pass. they are merely the same strengthened, thus: Sing. 2d,—[Aor. pass. *θη*, 1st Aor. act. (σ)ον] (pass. ο [1st Aor. mid. ι] or σσ); 3d, τω (pass. σθω.) Plur. 2d, τε (pass. σθε); 3d, τωσαν [or contr. ντων] (pass. σθωσαν. [Dual. 2d, τον (σθον); 3d, των (σθων.)]

§ 54. The Infin. in the act. forms ends in *εν*, [contr., with union-vowel into *ειν*] (Pres., Fut., and 2d Aor.) *αι*, (1st Aor.) or *ναι*, (Perf. act. and mid. and both Aor. pass.;) elsewhere in *σθαι*.

§ 55. In the Participles the stem ends in *ντ* in the act. forms, (except the Perf. act. and mid., which have *στ*;) the rest take *μεν*, (Perf. pass. *μένν*.) These latter are [masc. and neut.] of the second declension, the others of the third.

§ 56. Verbs in *μ* insert *σ* before the final *ι* of the 3d pers. sing. Pres. Indic. act., and vary in a few other terminations, chiefly by contraction.

LESSON V.

VERBS—Continued.

§ 57. The root of every *primitive* verb is a monosyllable, consisting of a short vowel (α , ϵ , ι , o , or $υ$) between two (usually simple) consonants. Sometimes one or the other of the latter has been dropped far back in the etymology. This root is most readily found in the 1st Fut., subject only to euphonic changes. The 2d Aor. always has a monosyllabic root, with a single vowel never long; but this may be somewhat different from the true root. Primitive verbs only have a 2d Aor.

§ 58. The Pres. and Imperf. commonly *strengthen* the root, either by adding a hard consonant, (sometimes more than one,) or (oftener) by changing the root vowel into the corresponding long one or diphthong.

§ 59. The following tenses add certain *characteristic* letters to the root:—

1st Fut. and 1st Aor. act. and mid., (of } verbs not liquid,) and 3d Fut. }	σ
1st Aor. pass.....	θ
1st Fut. pass.....	θησ
2d Fut. pass.....	ησ
2d (in liquid verbs 1st) Fut. act. and mid.....	ε
Perf. and Pluperf. Act. of pure and liquid verbs...	κ
Perf. and pluperf. act. ending in a pi- or kappa-mute (')	

§ 60. Tenses expressing *past time* (Imperf. and Aorists Indic.) prefix a ("syllabic *augment*") to the root; this coalesces with an initial vowel ("temporal augment") into the corresponding long vowel or diphthong. The Perf., Pluperf., and 3d Fut. not only do the same throughout the moods, but also prefix to the *syllabic* augment the initial consonant of the root ("reduplication") when this is a simple consonant or a mute followed by a liquid. The Pluperf. prefixes a second syllabic augment to the reduplication.

§ 61. Initial ρ , (which is doubled after the syllabic augment,) $\beta\lambda$, $\gamma\lambda$, and $\gamma\nu$, do not, except in a few cases, allow the reduplication. Verbs compounded with a preposition generally take the augment, etc., between it and the primitive. A few other irregularities occur.

§ 62. Verbs are classified in conjugation according to the radical letter following the root vowel, or diphthong, in the 1st pers. sing. Pres. Indic. act., lexicon form: in "liquid" verbs (not derivatives in $\acute{\alpha}\nu\omega$, which is merely

strengthened for $\acute{\alpha}\omega$) this is a *liquid*; in "pure" verbs it is absent, so that the root appears to end in a vowel, etc. Very many verbs seem to be anomalous in some of their forms in consequence of deriving these from an obsolete kindred root. The lexicon gives most of these peculiarities.

§ 63. *Liquid* verbs almost always strengthen their root in the Pres. and Imperf.; they lengthen it in the 1st Aor. act. and mid. by changing the root vowel, if a into η , if ϵ into $\epsilon\iota$, while ι and υ merely become long. ϵ as a root vowel is generally changed into a in the 1st Aor. and 1st Fut. pass., the Perf. and Pluperf. act. and pass., and the 2d Aor. and 2d Fut. throughout, and again into o in the Perf. and Pluperf. mid.

§ 64. The above strengthening in the Pres. and Imperf. consists in doubling λ , annexing ν to μ ; or, in case of ν or ρ , in adding ι to a preceding a or ϵ , or lengthening ι or υ . The radical ν is often dropped in Perf. and Pluperf.

§ 65. Verbs with ϵ followed by a pi- or kappa-mute in the root frequently neglect to strengthen it in the Pres. and Imperf.; and verbs with ϵ in the root preceded by a liquid, usually change it into a and o in the same tenses as liquid verbs, except in the 1st Aor. and Fut. pass.

§ 66. *Pure* verbs lengthen the root vowel before a tense characteristic, also in the Perf. and Pluperf. pass. A few occasionally neglect this, and some insert σ instead.

§ 67. Verbs in μ (lexicon form instead of ω) are but another mode of conjugating pure verbs (being the only primitives of that class whose root ends in a , ϵ , or o) in the Pres., Imperf., and 2d Aor.; in all which tenses the union-vowel coalesces with the root vowel. They have a peculiar inflection, chiefly by reason of the Imperf. and 2d Aor. act. taking throughout the terminations of the Aorists pass. The Pres. and Imperf. reduplicate with ι the initial consonant, (prefixing simply l if that cannot be done, and sometimes adopting other modes of strengthening,) and in the act. they lengthen the root in the Indic., a or ϵ into η , o into ω . The 2d Aor. (those in $\upsilon\mu$ being factitious have not this tense) has in the act. a long vowel or diphthong throughout, except the Imperative ϵ or o , and the Participle.

Notes on Certain Verbs in μ .

§ 68. $\tau\acute{\iota}\theta\eta\mu$ [to put] has, in the Act., 1st Aor. $\epsilon\theta\eta\kappa\alpha$, Perf. $\tau\acute{\epsilon}\theta\epsilon\iota\kappa\alpha$; $\delta\acute{\iota}\theta\omega\mu$ [to give] has, 1st Aor., $\epsilon\delta\omega\kappa\alpha$.

§ 69. $\epsilon\acute{\iota}\mu\iota$ [to be] is inflected thus: $\epsilon\iota$ [thou art], $\epsilon\sigma\tau\acute{\iota}(\nu)$ [is], $\epsilon\sigma\mu\acute{\epsilon}\nu$, $\epsilon\sigma\tau\acute{\iota}$, $\epsilon\iota\sigma\acute{\iota}(\nu)$ [we, ye, they are], $\iota\sigma\theta\iota$ [be thou], $\acute{\omega}\nu$ [being], etc.; the rest mostly regular. See the lexicon for these, and for $\acute{\iota}\eta\mu$ [to send], and $\epsilon\acute{\iota}\mu\iota$ [to go].

§ 70. Several verbs annex $\sigma\kappa\omega$, $\acute{\iota}\nu\omega$, (ν) $\nu\eta\mu$, etc., instead of $\mu\iota$, etc., in the Pres. and Imperf.

LESSON VI.

SYNTAX.—CONCORD.

§ 71. All words placed under the same construction agree together in all the accidents which they possess in common.

§ 72. "Apposition" occurs as in English.

§ 73. Adjectives agree with their nouns in gender, number, and case.

§ 74. The noun is often understood, especially if neut., ("things.")

§ 75. Sometimes a relative is "attracted" into the case of the omitted antecedent.

§ 76. A verb agrees with its subject nominative in number and person.

§ 77. The case of the subject of the Infin. depends upon other relations.

§ 78. Neuters plur. generally have a sing. verb.

GOVERNMENT.

§ 79. Any word may govern another (or others) which in sense is *dependent* upon it in the case appropriate for expressing such relation either with or without a preposition.

§ 80. GENITIVE, denoting *origin*, answering to *Whence?* and expressed by *from*.

§ 81. "Local," involving *external* relations of space, either in a literal or a figurative sense. This includes *actual motion* from an object, generally with a preposition, (*ἀπό ἐκ παρά*;) *separation* from it, usually with verbs compounded with a preposition; and *commencement*.

§ 82. "Causal," denoting a more *internal* relation, as if the outgoing of some agency or property, as follows:—

§ 83. *Active*, either direct, inferential, or metaphysical. This includes relations of source, (e. g., derivation, [commonly with *ἐκ*, sometimes *ἀπό*, direct authorship with *ὑπό*,] possession, property, [often with an Infin.]) *partitive* use, (e. g., a class, material, partial relations,) and the Gen. of time, (in the *course* of which,) especially the "Gen. absolute," with a Participle, as affording occasion.

§ 84. *Passive*, that is, indirect, the act being for the sake of the Gen. This includes verbs implying a *mental operation*, adjectives, and other words denoting *skill*, and the Gen. of *crime* or *purpose*, (the last mostly an Infin. with the article.)

§ 85. *Mutual*, e. g., *comparison* and *price* or *penalty*.

§ 86. The "attributive Gen." is a comprehensive relation, arising under several of the above heads, between two nouns designating *different* objects, which may be thus expressed: *When two nouns are connected with each other, that one which completes the idea of the other and defines it more fully is put in the Gen.*

§ 87. DATIVE, denoting *position*, answering to *Where?* and expressed by *at*.

§ 88. "Local," involving the more palpable relations of position. This includes the *place*, (at, by, near, in the midst of; generally with *ἐν, ἐπι, παρά*, etc.,) *association, accompaniment*, (frequently with *σύν*,) and the *time* (as a date) or *circumstances* of a transaction.

§ 89. "Causal," denoting the object *upon which* the act or state appears, thus conceived as sharing in producing it, as follows:—

§ 90. *Personal*, either actually or so imagined. This includes words expressing a *correlative* idea, as community, (in varied relations,) likeness, possession, agency, reference, etc.

§ 91. *Instrumental*, as the mediate cause, e. g., the ground or reason, the means, the instrument, manner, and the measure of excess or deficiency.

§ 92. In comprehensive phrase the "attributive Dat." expresses many indirect relations of an object *to* or *for* which an act is performed or a condition sustained.

§ 93. ACCUSATIVE, denoting *direction*, answering to *Whither?* and expressed by *toward*.

§ 94. "Local," involving the boundary, place, or object of motion, especially with *εἰς*.

§ 95. "Causal," involving an influence, change, or result, as impressed upon the object, as follows:—

§ 96. The *effect*, either the thing effected, an attribute of the effect, or the effect intended.

§ 97. The *object acted upon*, e. g., with directly transitive verbs, those expressing a good or bad influence, patience, swearing, sometimes a mental affection, etc.; also the *space* or *way* after a verb of motion; the time, (*throughout* which,) measure, and weight; and finally ("Attributive Accusative") with any verb or adj. (sometimes other words) to define its application more closely, especially if of kindred signification.

ORDER OF WORDS IN A SENTENCE.

§ 98. This is usually not, as in English, that of *grammatical* dependence, but rather the order of *thought*; important or emphatic words come first, after the connecting particles; prepositions and the article precede their nouns; and qualifying terms are grouped in a harmonious balance around the principal ones.

 3 ἦν³ ἐν¹ ἀρχῇ² πρὸς⁷ τὸν⁸ Θεόν.⁹ Πάντα¹² δι'¹³
 was in *the* beginning with God. All *things* by
 αὐτοῦ¹⁴ ἐγένετο,¹⁵ καὶ⁶ χωρὶς¹⁶ αὐτοῦ¹⁴ ἐγένετο¹⁵ οὐδὲ¹⁷
 him were made, and without him was made not even
 4 ἓν¹⁸ ὃ¹⁹ γέγονεν.²⁰ Ἐν¹ αὐτῷ²¹ ζωὴ²² ἦν,³ καὶ⁶
 one *thing* which has been made. In him life was, and
 5 ἡ²³ ζωὴ²² ἦν³ τὸ²⁴ φῶς²⁵ τῶν²⁶ ἀνθρώπων.²⁷ καὶ⁶ τὸ²⁴
 the life was the light of men; and the

 light in the darkness shines, and the darkness
 αὐτὸ³² οὐ³³ κατέλαβεν.³⁴
 it not admitted.

DIRECTIONS.—Spell the Greek, giving the *English* equivalents of the consonants, (as in § 1.) and the exact *phonetic* value or sound of the vowels. Call the rough breathing *h*. Be careful to put the spoken *accent* where it is written. Continue this practice through all the passages given in the following lessons, until the words can be pronounced readily and accurately. Familiarize yourself with the forms of the letters by *writing* them. Let the pupil do this while learning the foregoing grammatical lessons, and after the recitation of each of them let the teacher direct attention, while the passage at the head of the reading lessons is pronounced, to the examples illustrating each point, as they occur—by way of paradigm.
